

# IDENTIFY AN EQUIVALENT RATIO

## Equivalent Ratios

Multiply the 2 parts of the ratio by the same number

$$\frac{4 \text{ boys}}{7 \text{ girls}} \times 2 = \frac{8}{14}$$

## Other Examples:

Divide the 2 parts of the ratio by the same number

$$\frac{\$6.40}{4} \div 4 = \frac{\$1.60}{1}$$
